COMPANY OVERVIEW

- Owing to the development of small towns and cities, the demand for equipment that could lift and move heavy equipment is on rise and demand for cost effective, robust products are continuously growing. These factors, clubbed with Make in India campaign by government of India, formed the founding pillar for Hydrolift Cranes Pvt. Ltd. in the year 2016, in Khalapur, Raigad Dist., Maharashtra.
- Located on Old Pune-Mumbai Highway, the company with an area of 40,000 sq.ft., has its own R&D facility, a strong team of designers, state-of-the-art manufacturing equipment and industry standard processes.
- The company has a quality management system with certification for ISO 9001:2015. While quality is the prime motto of the Company - health, safety and environment protection is also given equal priority.
- We are one of the few crane manufacturers in the world to have a complete in-house design, manufacture and testing facility for cranes.

VISION

- To be a market leader, providing our Customers with Quality hydraulic products and services at competitive price
- 'BORN to LIFT' as its tagline, ensure that the customers never lack in Hydraulic lifting equipment and solutions
- Manufacturing indigenous products in line with the national program of "MAKE in INDIA"

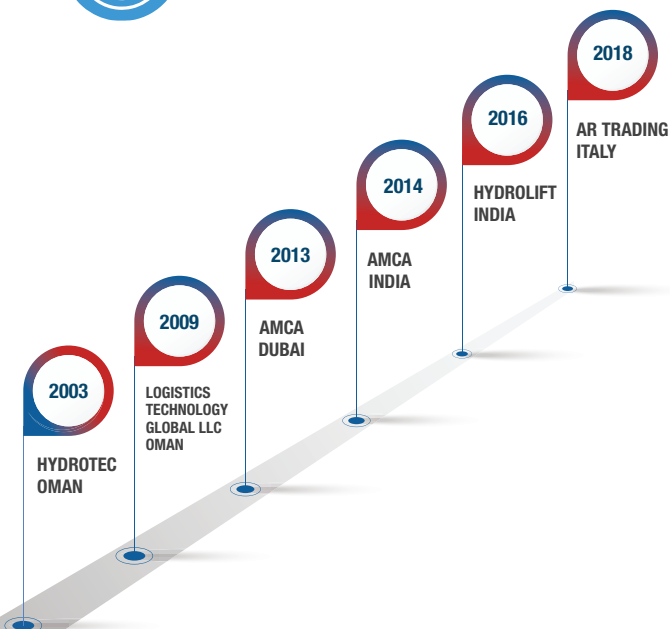

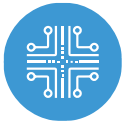

MISSION

- Understand the customer's requirement correctly to ensure that product and solution provided conforms to the customer's specification
- Development of a healthy work culture within the Organization where everyone values its customers and vendors as partners in the growth and development of the Organization
- Respect and follow the legal and statutory requirement of the Country
- Quality control at every stage of its operations to make sure the end products and services meet our Customer's expectation and more; that leads to a high level of customer satisfaction
- Adhere to all HSE norms at the workplace and protect the environment
- Deploy the best practices of the Industry

MILESTONES

INFRASTRUCTURE

- **Area:** Our Facility in Mumbai is built in 40,000 sq.ft
- **Equipment:** Equipped with high-end production equipment to meet the desired quality standards
- **Annual Production Capacity:**
Cranes: 400 | Lifts: 300
Cylinders: 5000 | Tailgates: 200

Shearing machine for fast cutting of sheet metals with lesser thickness and Bending machine with narrow and wide bending radius and numerically controlled for accuracy and precision

The CNC Plasma cutting machine is the heart of all operations. The plasma cut sheet metals conform to fine edge cutting and dimensions for accuracy. This also contributes to saving on wastage of raw material.

Fabrication shop is equipped with MIG welding machines, lathes and boring for final finish of the structure. The fitting bench is capable of manufacturing sub-frames & hydraulic oil tanks for mounting the cranes on the vehicle both new and old.

CNC lathes and boring machine for manufacturing high precision cylinders. Painting booth with shot blasting facility and heating oven for durability.

The assembly line is capable of carrying out the load tests, functional tests and safety tests of the cranes. The assembly line is having its own CNC tube bending machine, tube flaring and crimping machine for all sizes of tubes and hoses.

This facilitates the assembly process to speed up the production and testing of the cranes.

WE ARE THE FIRST COMPANY IN INDIA TO FULLY MANUFACTURE KNUCKLE BOOM CRANES AT OUR FACILITY THUS PUTTING INDIA ON THE GLOBAL MAP.

OUR TEAM - OUR STRENGTH

- We are a team of close to 100 employees - Our employees are more than just their skills & experience - It is their diversity of thoughts and ideas that make them our greatest asset

OUR PRODUCTS

HYDROLIFT™

BORN TO LIFT

1) Truck Mounted Cranes

Hydrolift manufactures truck mounted cranes to provide customers with hydraulic lifting solutions.

These cranes are divided into two categories Knuckle Boom Cranes and Telescopic Cranes with the lifting capacity ranging from 3tm to 20tm.

- a) **Knuckle Boom Cranes:** Knuckle Boom cranes are known for their user friendliness and reliability to function even under tough conditions. They are the most versatile cranes to function for any application. They are used in industries such as Maintenance & Construction, Shipping, Transportation and so on.
- b) **Telescopic Cranes:** Telescopic cranes are a form of heavy cranes employed to transport objects. These cranes are often used in day-to-day hauling operations and in the logistics industry.

2) Tail Lift

Hydrolift Tail lift is a loading ramp fixed onto a truck used mostly for loading & unloading operations.

3) Wheelchair Lift - Export

Hydrolift manufactures Wheelchair lifts that specially designed for cars and buses to provide mobility for people requiring special assistance

OUR PRODUCTS

BORN TO LIFT

4) Recovery and Towing Unit

Hydrolift manufactures special design recovery and towing units to help customers in the rescue of break down vehicle as well as the regional transport office (RTO) in towing vehicles abandoned or left unattended or parked in a parking restricted zone. We cater to recovery fitment of vehicles from small cars to heavy vehicles like trucks, trailers and tippers.

5) Skip Loader

Hydrolift Skip loader is engineered and designed for handling industrial waste, building rubble, household waste, food and hotel waste, scrap metal and even for STP slurry and crude oil waste. We produce series of skip loaders suitable for various market and truck starting from 7 ton to 40 ton.

6) Hydraulic Cylinders

Hydrolift is a leading manufacturer and exporter of various types of hydraulic cylinders. We manufacture cylinders to suit customer specifications. These cylinders are used in numerous applications. They are often seen at work in both industrial and mobile applications.
